

GTM / 00 • THE HYPE PHASE • PRODUCT-FIRST

PRE-REVEAL CONTENT CALENDAR

A 22-day campaign to place ALB'DO and FORGE in the web-framework conversation — the arena of Next, Astro, Remix. Copy and design direction for every post. We show the **product** and the **craft**; we hold the numbers, and we hold two stages of the work, until the reveal.

THE RELEASE

BETA, MADE REAL

ONE JOB: TAKE A SEAT AT THE FRAMEWORK TABLE.

For 22 days we earn ALB'DO a place in the web-framework conversation — not as another tool, as a different **idea** of what a framework is: you write the frontend, and the backend is a tier the **compiler** emits. Every post is about the **product**. No origin story, no “our journey” — the work speaks. We reveal the idea and the craft. We hold the numbers, and we hold two stages, for 15 August.

CONSUMERS

The builders shipping on Next / Astro / Remix today. Pulled by the heresy and the pain of the stack they maintain by hand.

“THIS DELETES MY BACKEND FOLDER”

EARLY ADOPTERS

The first hands who chase new frameworks for sport. Pulled by craft, determinism, and being first through the door.

“I WANT TO BUILD ON THIS NOW”

INVESTORS

Pulled by a credible new entry in a huge, contested category — and by proof (durability, DX) shown, not claimed.

“NEW PARADIGM, REAL DEMO”

IN PLAY NOW

ALB'DO — the frontend framework (Albedo · the mirror).

FORGE — the backend the compiler emits (Nigredo · the crucible).

PHOSPHOR — the runtime glow, used only as light/aesthetic.

HELD — AFTER 15 AUG

CTRNI'TAS (AI) and RUB'DO (fintech) stay dark. Do **not** name, tease with detail, or use their stage-colours (gold / oxblood) before the reveal. At the reveal they appear only as two locked stages.

THE GOVERNING PARADOX

Generate hype without hype language. The loudest thing in the feed is the quietest voice in the room. Every rival shouts “game-changer”; we speak like a lab logbook and a poet at once. **Cover the handle — the post still reads dark · precious · transmuted · slightly alive.** If it reads generic SaaS, we don't post it.

FIVE THINGS WE POST. ALL OF THEM, THE PRODUCT.

Every post is one of these. Two of them are the products themselves. Rotate; never abandon one.

I	THE HERESY	The reframe that earns the table: the backend was never yours to build — it is a compile target. The idea people argue about in the replies.	BUILDERS + INVESTORS
II	THE OLD WORLD	The enemy, drawn sharply: the hand-assembled stack — framework, ORM, database, queue, deploy, a bill that grows while you sleep. The pain everyone normalised.	BUILDERS + INVESTORS
III	FORGE	The backend proof. The crucible. THE DROP — the server killed mid-write, the order that survives. Durability as the default, not a bolt-on.	BUILDERS + EARLY
IV	ALB'DO	The frontend proof. The mirror. The DX — the app with no backend folder, the code you don't write. The face users touch, rendered as chrome.	BUILDERS + EARLY
V	THE VOID	The aesthetic itself as content. Chrome in black, the apostrophe glyph. While the feed is purple gradients, we are a rare object under museum light.	EVERYONE

Weekly lean: **WK1** Heresy + Old World (win the argument) · **WK2** FORGE + ALB'DO (show the proof) · **WK3** converge + countdown. The Void runs through all three.

TWO PLATFORMS. ONE SUBJECT: THE PRODUCT.

X / TWITTER

The technical surface. Heresy, FORGE proof, ALB'DO DX, process. Exact, a little uncanny. The growth engine from zero — carried as much by **replies** as posts.

1 POST / WEEKDAY + 3-5 REPLIES / DAY

LINKEDIN

The category surface — still product, not person. What the reframe means for teams and cost; where operators and investors read. Polished, plain.

2-3 POSTS / WEEK

DAILY BACKGROUND WORK

From zero, reach is borrowed before it's owned. Every day: reply with substance into the framework / Rust / "is X dead" threads where the audience already is. Before the reveal, DM the raw FORGE clip privately to a handful of dev voices — one repost outweighs a week of posting into your own void.

THE LAWS

- 01 **It's about the product.** Every post advances ALB'DO or FORGE. No founder story, no "our journey" — the work is the protagonist.
- 02 **No numbers before 15 August.** Teasers show the moment, never the metric.
- 03 **Two stages stay dark.** No CTRNI'TAS / RUB'DO, no gold or oxblood, before the reveal.
- 04 **No hype words.** No disrupt, seamless, next-gen, game-changer. Start every frame from true black; if it isn't reflective, it isn't ours. Honour the apostrophe.
- 05 **Measure waitlist · Discord · saves — not likes.** 400 serious signups beats 40,000 impressions.

THE PRODUCTION SPEC.

The whole campaign is one look. 90% monochrome, 10% stage-colour, aberration only at light edges. If a comp looks colourful, it is wrong.

PALETTE — IN USE

	FORGE BLACK	#08090B	the ground
	ARGENT	#C9CACE	chrome · hero
	GLASS	#BFE9F2	refraction · clarity
	PHOSPHOR	#B8FFE3	the bloom · rim-light
	FORGE EMBER	#FF7A2F	heat, inside FORGE only
	ABERRATION	cyan/mag	salt · at edges only
	CITRINITAS	#E8B33D	HELD · do not use
	RUBEDO	#C1272D	HELD · do not use

MATERIALS

Chrome (hero, mirror-polished, banded, always flowing) · **Glass** (secondary, refraction) · **Void** (near-black ground) · **Bloom** (light as material, a white rim behind every object).

TYPE

Display — heavy grotesque, tight, uppercase, negative tracking (Neue Haas / Archivo Black weight). **Marginalia** — monospace, small, wide-tracked: dates, coordinates, spec captions, barcodes.

THE APOSTROPHE

ALB'DO — the hero glyph. A chrome sliver / a bead of mercury with a cyan-magenta seam. Never generic punctuation. Doubles as the favicon seed.

COMPOSITION

One object, centred, floating in black with a bloom behind it. Spec-sheet scaffolding — hairlines, corner ticks, rotated labels, mono coordinates, index numbers. A catalogue plate of a rare artifact. The luxury is the emptiness.

DELIVERY FORMATS

X STATIC · 1:1 1080×1080 / 4:5 1080×1350	X VIDEO · 16:9 1920×1080 (+1:1 CUT)
LINKEDIN · 1:1 / 4:5 / PDF CAROUSEL 1080×1080	COUNTDOWN · 1:1 TEMPLATE, RISING LUMINANCE

WEEK 01 · THE BLACKENING

25 JUL - 01 AUG

Intent. Win the argument. Plant the heresy, name the enemy stack, and introduce FORGE as the crucible. Establish the void and the apostrophe. **Goal:** from zero to “a new framework idea is in the room.”

25

JUL · FRI

X

THE HERESY

ALKMY / ALB'DO

PINNED THREAD

1:1 hero

COPY

“Every web framework gives you the same deal: write the frontend, then go build a backend by hand — servers, a database, a queue, a deploy target, a monthly bill. We think that half was never yours to build. It’s something the compiler should emit. This is ALB'DO. 15 August.” (thread: frontend is authored, backend is derived — not serverless, not a BaaS; a compile target.)

DESIGN

Hero, 1:1. A single liquid-chrome ingot mid-transformation, mirror-polished with banded reflections, floating dead-centre in true black; soft white rim-bloom behind. Bottom-left mono: “**ALB'DO // A FRAMEWORK THAT EMITS ITS OWN BACKEND**”; top-right index “GTM-00 · 51.5074°N”; corner ticks. Monochrome but for a whisper of cyan/magenta on the brightest edge. Apostrophe = a chrome sliver.

26

JUL · SAT

X

THE VOID

ALB'DO

IMAGE ONLY

4:5

COPY

One mono line only: “ALB'DO. the mark is not missing a letter. it is showing you what we removed.”

DESIGN

The apostrophe, hero glyph, 4:5. Extreme close-up of a bead of liquid mercury caught mid-fall, a vertical seam of light cut through it, cyan/magenta split at the edges — the one place colour enters. Black void, rim-bloom. Glyph sits high, occupies ~1⁄3 frame; the rest is negative space. This asset is also the **favicon / app-icon seed**.

28

JUL · MON

X

THE OLD WORLD

STATIC

1:1

COPY

“Your app in 2026: a frontend framework, a backend framework, a database you babysit, an ORM, a queue, a cache, a deploy platform, and a bill that grows while you sleep. Nobody designed this — it accreted. A framework should hand you the whole thing, and the backend should cost you zero lines.”

DESIGN

The enemy as an invoice, 1:1. A cold spec-sheet / catalogue plate: a hairline-ruled parts list — FRONTEND · BACKEND · DATABASE · ORM · QUEUE · CACHE · DEPLOY · \$\$\$ — each row in dim monospace with a tiny barcode and a rising cost column. At the bottom, one line struck through in bright chrome: “**ALB'DO — BACKEND: 0 LINES**”. Aberration only on that struck line’s edge.

WEEK 01 · (CONTINUED)

29 JUL — 01 AUG

29

JUL · TUE

IN

THE HERESY

POST + DIAGRAM

1:1

COPY

"The last decade of web infrastructure sold you a rental — servers you don't own, priced by the request, scaling into a bill you can't predict. The next decade belongs to compilers that don't need the rental at all. We built a framework where your data model is your backend: the compiler emits the storage and the API from code you already wrote. Here's why 'serverless' was always a half-measure."

DESIGN

Before/after diagram, 1:1. LEFT (dim, labelled THE OLD WORLD): a tangle of cold-grey boxes — app → API → ORM → DB → queue → cache — thin connecting lines. RIGHT (chrome, labelled ALB'DO): one monolithic chrome object with a thin light-seam, caption "you write this ↑ / the compiler emits the rest". Void ground, spec-sheet framing, mono labels, rim-bloom on the right object.

30

JUL · WED

X

FORGE

FORGE

PROCESS CLIP

1:1 · 6-10s

COPY

"This is FORGE — the part of the framework you never write. You declare what your app remembers; it becomes a real, durable backend at compile time. Named for the black stage of the work: the crucible where raw input is broken down and remade."

DESIGN

Silent screen-capture, 1:1, 6-10s. Chrome-tinted terminal on black: a few lines of ALB'DO source (a data declaration) on the left; on the right, the compiler **materialising** a backend — tables, an API surface — each line resolving with a faint chrome sheen and a rim-glow. Mono lower-third: "NIGREDO · dissolution · matter broken down to be remade". One low tone or silence. Ember allowed here (FORGE's heat), nowhere else.

01

AUG · FRI

X

THE VOID

IMAGE + TEASE

1:1

COPY

"Week one, you've seen the black — the crucible, the backend that builds itself. Next week: the mirror. The face you actually touch."

DESIGN

Transitional image, 1:1. A surface resolving from matte black (left) into liquid mirror-chrome (right) that faintly reflects a hint of a UI; rim-bloom along the seam. Mono marginalia: "WK01 → WK02 · NIGREDO → ALBEDO". Teases ALB'DO's frontend for next week.

BACKGROUND — SUN 27 & THU 31 JUL: REPLY-DAYS. THU 31: QUOTE A LIVE "FRAMEWORK X IS DYING" THREAD WITH THE HERESY. NO ORIGINAL ART.

WEEK 02 · THE WHITENING

04 — 10 AUG

Intent. Show the proof. FORGE’s durability (THE DROP) and ALB’DO’s DX — the moment shown, the numbers withheld. **Goal:** turn “interesting idea” into “this is real, I need in.”

04

AUG · MON

X

FORGE

FORGE · THE DROP

CENTREPIECE CLIP

16:9 (+1:1) · 12-20s

COPY

“We pulled the power on the server in the middle of a live checkout. On purpose. The last ticket sold exactly once — no double-sell, no lost order, no cleanup. The framework did that, not us. We’ll show you how on 15 August.”

DESIGN

The money clip, 16:9 (cut a 1:1 too), 12–20s. Split screen: LEFT a live flash-sale UI in chrome-and-black, a stock counter ticking down; RIGHT a terminal running the server. At the climax a switch **kills the server** — one frame of screen-tear + cyan/magenta aberration as it dies — the UI flickers, then resolves: **“SOLD · 1 → 0 · no oversell.”** No metrics on screen. End card: void, chrome apostrophe, **“FORGE · the order survives the machine. 15 AUG.”** The kill is the only place aberration spikes.

05

AUG · TUE

IN

FORGE

FORGE

STILL + POST

1:1

COPY

“For anyone who’s run a launch, a ticket drop, a flash sale: what happens to the order mid-write when your server dies? Today’s honest answer is ‘we reconcile later, and sometimes we oversell.’ We built a framework where the answer is ‘nothing — it can’t lose it.’ Durability isn’t a feature you bolt on. We made it the default.”

DESIGN

Frozen still from the DROP, 1:1. The kill-moment held: the dying server, the UI steady. Heavy negative space, mono caption **“THE ORDER SURVIVES THE MACHINE”**. Chrome/black, one rim-bloom. Restrained — this one is for operators.

06

AUG · WED

X

ALB’DO

ALB’DO

HERO IMAGE

4:5

COPY

“ALB’DO — Albedo, the whitening. The mirror stage of the work: washing to silver, purification, reflection. It’s the part users see, so we made it the most polished thing we build. The face, rendered as chrome.”

DESIGN

The flagship “alive” image, 4:5. The ALB’DO mirror motif: reaching liquid-chrome hands, or a molten-chrome face reforming, or the mirror-polished chess queen. Liquid silver, banded reflections, faintly alive; strong Phosphor rim-bloom. Reserve real craft here — this is the brand’s most tender frame. Silver monochrome only; mono marginalia + apostrophe glyph.

WEEK 02 · (CONTINUED)

07 — 08 AUG

07

AUG · THU

X

ALB'DO

ALB'DO · DX

CLIP OR CAROUSEL

1:1

COPY

"This is a complete, deployed application — auth, a database, a live-updating page. Watch how much of it you don't write. There's no backend folder. There's no API layer. You wrote the part that's yours; the compiler emitted the rest."

DESIGN

DX reveal, 1:1 — short capture or 3-panel carousel.

Panel 1: a compact ALB'DO source file (chrome-tinted editor on black). Panel 2: the running app beside it. Panel 3: the file-tree with the **backend/ folder conspicuously absent** — a struck-through ghost label "backend/ — emitted". The magic is the absence. Keep code legible; builders will scrutinise it. Mono lower-third.

08

AUG · FRI

X

THE HERESY

THREAD + 1 DIAGRAM

1:1

COPY

"Determinism is a feature, not an accident. If your framework can't tell you what your app will do — what it reads, what it writes, what it costs — before it runs, it isn't finished. Here's how ALB'DO decides at compile time what becomes a page, an action, or durable state."

DESIGN

One hairline diagram, 1:1.

A compile-time split: SOURCE → { PAGE · ACTION · DURABLE STATE } as three chrome nodes branching from one, spec-sheet style, mono labels. Low ink, high clarity. Earns the serious devs without exposing the moat.

Same day: DM the raw DROP clip to a few dev voices for reposts.

BACKGROUND — SAT 09 AUG: A SINGLE QUIET ALB'DO AESTHETIC RE-SHARE. SUN 10 AUG: REPLY-DAY. HOLD THE COUNTDOWN FOR MONDAY.

WEEK 03 · THE LIGHT-BEARER

11 — 14 AUG

Intent. Converge ALB'DO + FORGE and count down. Phosphor is the rim-light, so the template **brightens each day** — IV near-dark, I in full bloom. **Goal:** fill the room for the 15th.

11

AUG · MON

X

IN

THE VOID

COUNTDOWN IV

1:1

COPY

"IV. Four days until a web framework where the backend is a compile target. ALB'DO + FORGE. 15 August."

DESIGN

Countdown template, 1:1. Roman IV in heavy chrome grotesque, centred in void, low rim-bloom (darkest of the four). Mono: "IV / I · 15 AUG · THE FIRST FRAME"; corner ticks. This sets the template — reuse for III/II/I with rising luminance.

12

AUG · TUE

X

IN

FORGE + ALB'DO

COUNTDOWN III

1:1

COPY

"III. On Friday we show you the numbers we've been holding — build times, cold starts, the cost of the backend you didn't write. We think you'll want to sit down."

DESIGN

Countdown III, one notch brighter. Behind the numeral, a faint ghosted spec-sheet of redacted numbers (metrics blacked out — coming, not shown). Aberration on one redaction bar.

13

AUG · WED

X

FORGE + ALB'DO

COUNTDOWN II + AMA

1:1

COPY

"II. Before the reveal we're opening the doors — ask us anything about ALB'DO and FORGE, Thursday, in the Discord. Bring your hardest 'but what about...'"

DESIGN

Countdown II, brighter. Below the numeral, a mono lab-logbook block: "OPEN FLOOR · THU · [DISCORD] · ASK ANYTHING".

14

AUG · THU

X

IN

THE VOID

COUNTDOWN I

4:5

COPY

"I. Tomorrow, the light."

DESIGN

The strongest frame of the run, 4:5. The apostrophe glyph fully resolved into brilliant liquid chrome at maximum rim-bloom — the payoff of the week's brightening. Almost no text: just "I" and the glyph. The held breath.

15 AUGUST · THE REVEAL

The one day we speak loudly — still plainly. Everything the 22 days pointed at drops at once, both platforms. **X**: the launch thread + film. **LinkedIn** (cofounder): the category post — “a new bet in the web-framework space”, product not person. **Landing page** + a LinkedIn **PDF carousel** walking the arc.

DROP / 01

ALB'DO

The framework, named and shown. The mirror — the frontend you write. The heresy answered: the backend is a compile target.

DROP / 02

FORGE

The backend you never build. THE DROP explained in full — the how behind the order that survives the machine.

DROP / 03

THE NUMBERS

Everything held for 22 days: [insert build times · cold start · backend cost · the benchmarks you'll defend]. Plus PHOSPHOR named as the runtime.

DROP / 04

THE DOOR

Early-access / waitlist opens for the September beta. Discord becomes home. The ALKMY house revealed as the umbrella.

STAGE · HELD

CITRINITAS

Shown only as a locked, blacked-out stage. “Later.”

STAGE · HELD

RUBEDO

Shown only as a locked, blacked-out stage. “Two stages remain.”

After → Sep end: convert waitlist to design partners in the open; “the first thing built on ALB'DO” becomes the next wave of proof. The reveal earns the audience; the beta turns them into users.

WHAT THE DESIGNER MAKES.

ALB'DO chrome-ingot hero (1:1) — opening manifesto image.	BEFORE WK1
Apostrophe glyph (4:5) — mercury bead, aberration seam. Favicon seed.	BEFORE WK1
“The enemy” invoice plate (1:1) — the hand-built stack as a cost sheet.	BEFORE WK1
Old-world vs ALB'DO diagram (1:1) — tangle vs one chrome object.	BEFORE WK1
FORGE process clip (1:1, 6–10s) — compiler materialising a backend.	BEFORE WK1
WK1→WK2 transition image (1:1) — black resolving to mirror.	BEFORE WK1
THE DROP clip (16:9 + 1:1, 12–20s) — server killed, order survives. No metrics.	BEFORE WK2
DROP still (1:1) + ALB'DO mirror hero (4:5) + DX reveal (1:1 / carousel) + determinism diagram (1:1).	BEFORE WK2
Countdown template IV·III·II·I (1:1 / 4:5) — rising luminance, redaction + AMA variants.	BEFORE WK3
Reveal film (30–60s) + landing page + LinkedIn carousel + two locked stage plates.	BEFORE 15 AUG

THE ONE-FRAME TEST — RUN IT ON EVERY ASSET

Cover the handle. If the frame still reads dark · precious · transmuted · slightly alive, it's ALKMY — ship it. If it reads generic SaaS, start over. And two hard checks for this phase: **no numbers, and no gold or oxblood** — those belong to stages we haven't revealed.
